

File Code: 2230/2210-1

Date: August 19, 2010

FRANK MCNELLEY
721 W. SHERMAN AVENUE
WILLIAMS, AZ 86046

Dear Frank:

This document amends your Annual Operating Instructions (AOI) for the Davenport Allotment during the 2010 grazing season due to the standing water in Depot Pasture as of August 03, 2010. As stated in the 2004 environmental assessment for the Davenport Allotment; livestock grazing use within the Depot Pasture will occur only when standing water has left Depot Lake for a period of 10 days.

The pasture sequence on the Davenport Allotment is the **only** item amended. The following is the amended pasture sequence for the 2010 grazing season on the Davenport Allotment:

Davenport Allotment – 169 days

Pasture	Grazing Period	Number of Days
Chalender	May 16 to June 25	41
Boxcar Hill	June 26 to August 4	40
Butler	August 5 to September 9	36
Fix	September 10 to October 24	45
Depot	October 25 to October 31	7

Depot Pasture may be rested this year due to fence construction delays and weather conditions. However, if forage conditions warrant movement off the Butler or Fix Pastures early Depot Pasture may be needed to complete allotted days. Average allowable use in key areas of any pasture would remain at 30%. You indicated that you were planning to move cows off the allotment on October 25, 2010; this may preclude the need to use Depot Pasture.

If you have any questions or wish to discuss anything further, please feel free to contact Natural Resource Specialist Karlynn Huling at 635-5621 (email - khuling@fs.fed.us), or FAX at (928) 635-5680.

Sincerely,

/s/ Martie Schramm
